

# **AJO CENTER FOR SUSTAINABLE AGRICULTURE**

## **Backyard Garden Program**

**Do you want to install a vegetable garden in your backyard?**

**We can help!**

We provide financial and technical assistance for:

- installation
- soil/compost
- lumber/materials
- fencing
- irrigation
- planting and harvesting

We can help you decide what kind of garden is right for you, and determine the best location for a garden on your property. Funding recipients are asked to finance at least one aspect of their garden by themselves, and to share a portion of their produce with the community, either by donating food to friends and neighbors or selling produce at the farmers market or through our community supported agriculture group. You will also be able to receive compost, seeds and seedlings as part of the Center's distribution program. Last but not least, you will be a part of a network of experienced Ajo gardeners who will share their time and knowledge with you!

\$10 annual membership fee. Organized by the Ajo Center for Sustainable Agriculture in cooperation with the Ajo Regional Food Partnership
